PREFACE.

The first portion of the late Mr. Gilbert C. Drabble's collection now offered, contains an unusually fine series of early British Coins, many choice English Gold Coins, and an exceptionally nice series of Saxon and Norman Coins, many of which are from famous collections.

The most desirable pieces in nearly every case have been illustrated at the end of the catalogue.

The numbering of types in the Saxon and Norman Coins follows that of the British Museum catalogues for these series.

It will be noticed that the collection is particularly strong in Hampshire mints, as the late Mr. Drabble endeavoured to obtain all the moneyers and types of each mint in Hampshire.

The second portion to be sold later, will contain English penny series to the present day, a choice collection of Roman Consular Denarii ; a very fine series of Roman portrait Coins, chiefly in silver, and an unusual collection of Coins and Medals relating to days from early Greek types to present day.

PRICED CATALOGUES

AFTER each sale these catalogues are issued with the prices realised printed in the margin opposite each lot, thus giving at a glance a reliable guide to values.

The final test of value must always be auction prices rather than the figures given in books of reference, for changing times and fashions soon render the latter obsolete and misleading.

On the average we issue twelve Coin and Medal catalogues a year, some of which are usually of sales of important collections. The **priced catalogues** are posted to subscribers as soon as ready, usually about a week after the date of sale and the subscription is . . . .
